

# Prevent Childhood Lead Poisoning

Exposure to lead can seriously harm a child's health.

Damage to the brain and nervous system

Slowed growth and development

Learning and behavior problems

Hearing and speech problems

**This can cause:**

Lower IQ

Decreased ability to pay attention

Underperformance in school

## Lead can be found throughout a child's environment.

1

Homes built before 1978 (when lead-based paints were banned) probably contain lead-based paint.

When the paint peels and cracks, it makes lead dust. Children can be poisoned when they swallow or breathe in lead dust.

3

Lead can be found in some products such as toys and toy jewelry.

4

Lead is sometimes in candies imported from other countries or traditional home remedies.

2

Certain water pipes may contain lead.

5

Certain jobs and hobbies involve working with lead-based products, like stain glass work, and may cause parents to bring lead into the home.

# The Impact

**535,000**

U. S. children ages 1 to 5 years have blood lead levels high enough to damage their health.

**24 million**

homes in the U.S. contain deteriorated lead-based paint and elevated levels of lead-contaminated house dust.

**4 million** of these are home to young children.

It can cost

**\$5,600**

in medical and special education costs for each seriously lead-poisoned child.

# The good news: Lead poisoning is **100%** preventable.

Take these steps to make your home lead-safe.

**Talk with your child's doctor** about a simple blood lead test. If you are pregnant or nursing, talk with your doctor about exposure to sources of lead.

Talk with your local health department about **testing paint and dust in your home for lead** if you live in a home built before 1978.

**Renovate safely.** Common renovation activities (like sanding, cutting, replacing windows, and more) can create hazardous lead dust. If you're planning renovations, use contractors certified by the Environmental Protection Agency (visit [www.epa.gov/lead](http://www.epa.gov/lead) for information).

**Remove recalled toys and toy jewelry from children and discard as appropriate.** Stay up-to-date on current recalls by visiting the Consumer Product Safety Commission's website: [www.cpsc.gov](http://www.cpsc.gov).
